| Media | Air Water |
| Temperature | 250° F |
| Threads | <ul style="list-style-type: none"> • 1/8" to 1/4" NPT • Machine Thread • BSP & BSPP Available |
| Pressure | 117 PSI |
| Speed | 3,500 RPM |
| Material | Nickel Plated Steel |

Features & Benefits

High Speed Air & Water Applications

Ideal for high speed air and water applications with space constraints.

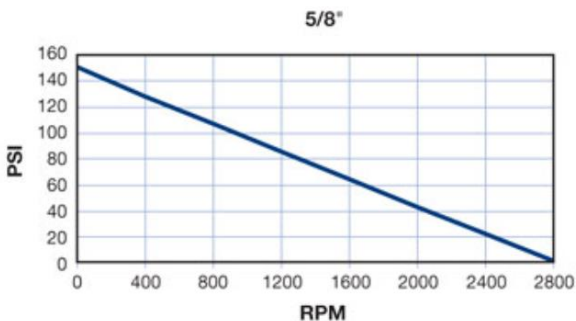

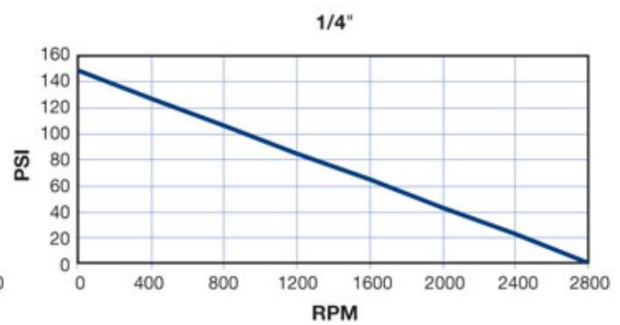

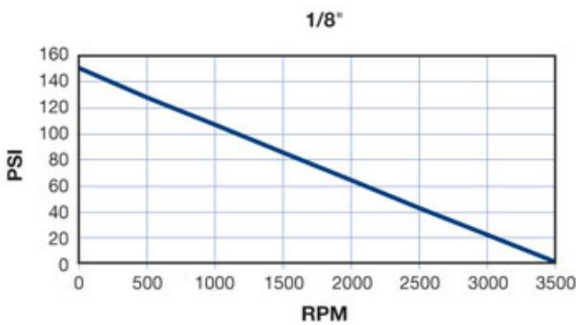

Corrosion Resistant

All steel parts are nickel plated steel for corrosion resistance.

Small Profile

Small envelope dimensions make the 300 Series suitable for use in applications with space constraints.
